**ARTISTMARK** redefines contemporary portraiture by turning the iPad into a powerful expression of human creativity. See more by visiting his [website](#).

"Geometric Jazz – EPNFT 401" original iPad painting, 24" x 24" inches

I am ARTISTMARK, a critically acclaimed pioneer in digital art who creates exclusively on the Apple iPad. My work is grounded in a core belief: true artistic expression flourishes when technology becomes an extension of human vision, not a substitute for it.

"Unspoken Hands – EPNFT 945" original iPad painting, 24" x 24"

In an era saturated with commoditized, algorithm-generated AI imagery, my process stands firmly on the side of human-driven creativity. Every portrait is shaped through my own hands, guided by intuition, technological experimentation, and a deep respect for a craft that will always be in its infancy.

"Fractured Gaze – EPNFT 836" original iPad painting, 24" x 24"

Experimental POP ART Portraits are bold, original works that merge my contemporary drawings with a curated recipe of layered iPad applications—forming a new genre of intelligent, iPad art.

"Cosmic Citizens – EPNET 244" original iPad painting, 24" x 24"

My process is both intentional and spontaneous. Each piece evolves through a sophisticated sequence of layering, blending, and textural exploration. This results in digital paintings that feel multi-dimensional and alive beyond the canvas.

"Hearts in Hand – EPNFT 835" original iPad painting, 24" x 24"

The visual language of my work synthesizes influences from Picasso's deconstruction of form, Dali's taste for the surreal and unexpected, Warhol's celebration of pop culture, and Basquiat's raw, electric energy. These inspirations are not replicated but transformative and reimagined, then woven into a fresh digital narrative that pushes the boundaries of what iPad art can be.

"Face in Flux – EPNFT 740" original iPad painting, 24" x 16"

My award-winning portraits have been showcased and exhibited internationally, including the Apple Store and Art Expo New York. With a portfolio of more than 500 original works, I create pieces ideally suited for forward-thinking galleries and discerning collectors. Each portrait invites viewers into a deeper dialogue—one that explores the dynamic interplay between color, form, technology, and design.

"Fragmented Majesty – EPNFT 403" original iPad painting, 24" x 24"

As the art world continues to embrace the evolving relationship between human creativity, AI and digital tools are highlighted by major museum retrospectives of iPad artists such as David Hockney.

"Shattered Whisper – EPNFT 163" original iPad painting, 24" x 24"

I am committed to expanding what this medium can achieve. My goal is to build meaningful gallery partnerships that bring my Experimental POP ART Portraits to broader audiences. I continue to challenge conventions and redefine the possibilities of contemporary digital-iPad art.

"Twin Echoes – EPNFT 072" original iPad painting, 24" x 24"

I believe the next Picasso will be a digital artist.
