ART THAT FEELS HUMAN.

COLOR | EMOTION | EXPRESSION | POSSIBILITY

THE PRACTICE

ARTISTMARK is a New York contemporary painter creating entirely by hand on the Apple iPad. His work explores contemporary painting, technology and human creativity through vibrant color, expressive linework, layered texture, abstraction and portraiture.

NEW YORK + TECHNOLOGY

Decades in a city defined by movement, reinvention, contradiction and change shaped his perspective. Technology became central to his art — a natural extension of a creative life built on observation, curiosity and constant evolution.

THE IPAD AS STUDIO

An early adopter of the iPad as a professional artistic medium, ARTISTMARK transformed a mobile device into a studio. The iPad is his studio and the Apple Pencil his primary instrument — portable, powerful and limitless in its creative possibilities.

THE ART IS THE PROCESS.

Original drawing, layering, editing, manipulation, experimentation and refinement. Purpose-built creative applications are approached as painters use brushes, pigments and surfaces — with intention, discipline and an ongoing pursuit of what painting can be in the digital age.

INTELLIGENT ART BY DESIGN.

Technology is a tool, guided entirely by human imagination and artistic decision-making. Every line, color, texture, form and composition is deliberately created and refined.

NO GENERATIVE AI.

THE TECHNOLOGY IS THE MEDIUM. THE ARTIST REMAINS HUMAN.

FRAMING VISUALIZATIONS BEYOND THE DIGITAL CANVAS.

The art lives beyond the screen. Each piece can be presented in a gallery-quality frame, bridging digital creation and the physical world.
